

Isaiah J. Robinson

Design Leader

857-701-5405 • ijr.design • me@ijr.design

Summary:

A strategic design leader and manager who believes the best experiences are both beautifully crafted and rigorously strategic.

With 8+ years working across Fortune 500 companies in fintech and tech and hands-on startup environments, I specialize in cross-channel CX strategy and experience systems that connect every touchpoint of a customer's relationship with a brand.

My contributions as a design leader have led to significant business growth and customer satisfaction -- from 80% YoY NII growth at JP Morgan Chase, to products ranked highest in customer satisfaction by J.D. Power, to design systems that drove 130%+ increases in conversions.

I believe the best design work happens when people feel empowered to lead, and I make it my job to create that space. My work lives at the intersection of creative craft and systems thinking, connecting experiences across channels, aligning cross-functional teams, and building the kind of clarity that gets C-suite buy-in.

Core Skills:

UX Strategy • Experience Strategy • CX Ops
Journey Mapping • Product Design
Design Systems • Interaction Design
Visual Design • Workshop Facilitation
People Management • Design Mentorship
Stakeholder Management • AI Prompting
Cross-Team Collaboration • Roadmap Influence

Tools:

Figma Suite • Adobe Suite • AI/LLM Tools
HTML • CSS • JavaScript • Claude Code

Education:

Connecticut College
B.A. in Economics, Art

Interaction Design Foundation
Certificate in Human-Computer Interaction

Ideo U
Human-Centered Strategy Certificate

Designlab
Certificate in AI for Visual Design

JP Morgan Chase & Co. VP, UX Design Lead

Card CX

November 2025 - Present

Leading cross-card experience strategy for Chase's Card business, establishing the systems, frameworks, and standards that shape how millions of cardmembers experience the brand across every touchpoint.

- Leading Card CX strategy, defining cross-card experience standards, north-star principles, and journey guidelines adopted across multiple product teams and verticals
- Established a CX Journey Framework and Audit Toolkit, creating a repeatable, enterprise-scale methodology for evaluating end-to-end cardmember journeys across customer lifecycle moments
- Served as central CX partner for Card leadership, balancing strategic direction with execution constraints and regularly socializing findings with C-suite and cross-functional stakeholders
- Acted as a connector across teams, aligning CX strategy with BAU expansion work spanning communications, account management, onboarding, and rewards

Lending Innovation

January 2024 - November 2025

Expanded scope to lead and manage the Card Installments design team, driving the experience strategy for Chase Pay Over Time across web, native app, and point-of-sale surfaces.

- Managed and mentored associate designers across strategic workstreams, providing direction, feedback, and space for team members to grow and lead
- Contributed to an 80% year-over-year growth in Net Interest Income, rising from \$95.5M in 2024 to \$170.5M in 2025, through experience improvements that drove BNPL adoption and engagement
- Supported Chase Pay Over Time's recognition as Highest in Customer Satisfaction among Buy Now Pay Later Providers by J.D. Power in 2025
- Partnered cross-functionally with Product, Legal, Data and Analytics, and Tech to drive consistent, high-quality CX across Card Installments

Joined Chase's Lending Innovation team as an individual contributor, leading experience strategy and product architecture for Chase's BNPL products at point of sale.

- Defined the end-to-end point-of-sale design strategy for Chase's BNPL products, including Chase Pay Over Time (CPOT) and Project Springfield, resolving how multiple lending options coexist clearly within a single checkout experience
- Drove rapid, high-fidelity concepting for Project Springfield under tight timelines, socializing findings with QUAD partners and aligning teams on an approach that improved comprehension and scalability
- Defined a forward-looking vision for Lending Innovation, positioning lending as an integrated layer within digital wallets and articulating a differentiation strategy leveraging Chase's rewards, trust, and multi-platform presence

Comcast

UX Designer III (Contract)

Xfinity

November 2012 - December 2024

- Led end-to-end UX/UI design for Storm-Ready WiFi across 6 dynamic service states within the Xfinity app, establishing a horizontal design approach that connected product, outage, and device management experiences into a single cohesive journey

Comcast (Continued) UX Designer III (Contract)

Xfinity

November 2012 - December 2024

- Advocated for and delivered a redesigned device details page -- the first in Comcast's product suite to support dynamic, real-time device states -- securing design leadership and product buy-in through wireframe-led critique sessions
- Designed an outage simulation prototype to conduct moderated research in realistic, emotionally resonant conditions, surfacing key insights around customer anxiety, battery awareness, and information-seeking behavior during outages
- Collaborated with three designers post-launch to define a forward-looking vision for the full outage experience, leveraging Storm-Ready WiFi expertise to shape proactive, informative customer journeys

Sanctuary Ventures Inc. Lead UX/UI Designer (Freelance)

Sanctuary App

March 2021 - December 2024

- Built Sanctuary's first comprehensive design system from scratch, covering typography, color, components, and layout principles across iOS and Android, driving a 135% increase in conversions within the first month of launch
- Led an end-to-end redesign of the app including the homepage, reader profiles, buy flows, and content management system, translating a competitive analysis and app audit into a cohesive, scalable design language
- Partnered closely with product owners and creative directors to align the design system with long-term brand vision and ensure consistency across all digital surfaces

HP Inc. Product Designer (Contract)

HP Connect for Microsoft Endpoint Manager

March 2021 - December 2024

- Led end-to-end product design for HP Connect for Microsoft Endpoint Manager, a cloud-based enterprise IT solution, owning the experience from journey mapping and workshops through high-fidelity delivery
- Facilitated cross-functional workshops with product, engineering, and marketing stakeholders to define user flows and translate complex BIOS management concepts into a clear, intuitive web experience
- Developed a custom HP Connect design library rooted in HP's web design system, creating scalable components that supported consistent implementation across policy, secret, and device management features

Early Career UX/UI, Visual Design, Branding Specialist (Contract)

Terra Digital, Lokavant, Appleseed Consulting, KSA Marketing
2018 - 2022

- Delivered UX/UI, brand identity, and design system work across startups and agencies, supporting digital products, marketing sites, and social campaigns for regional and national clients
- Created social campaigns for a global nonprofit gala that raised \$2M and boosted engagement by 30%
